December 2013 Short Money Forward Futures: What can we say? Since early 2011 short money contracts had great UPSide run defying all the central bank hike opinions. That's the history of deep discounts in forwards, and the previous push on the upside seemed to indicate all central banks were on a path toward 0.00% base rates. However, the more important decision now evolves to base rate expectations after the near term return to questionable environment in Europe. And that means more than just Italian election disruptive influences. Even before that the bank LTRO reimbursements to the ECB were falling below estimates, indicating concerns about fragility of the economy. All of which should underpin the Short Money forwards if equities will remain weak in the near term. Quite a bit may rest with March S&P 500 future decision in the 1,475-65 range.

USD INDEX: The recovery of the euro and psychology in Europe made another selloff below .8000 area no surprise. QE-driven equities rally made that a fair result. Yet it held another test of .7930-.7860 support, and above .8080 I.t. MA, Fibonacci and congestion the weekly MACD turning UP along with the daily creates a lot of upside momentum.

EUR/USD: While major 1.3450-1.3550 resistance temporarily violated, spill back below it two weeks ago was a fresh DOWN Break with Daily MACD DOWN. That pointed to the weakness which has led to serial failures below mid-1.3200 and 1.3170-1.3200 supports. 1.2950-1.3000 now key support especially with weekly MACD back in balance (from UP.)

GBP/USD: Much as with EUR/USD above 1.2500-1.2450, the August push above 1.5750 key weekly MA's, Fibonacci and congestion led to a full extension to major 1.6300 area. Yet serial failures below 1.6000-1.5950, 1.5750 and 1.5500-1.5450 have led to failure of the major 1.5268-33 multi-year lows. Only 1.5000-1.4950 if left this side of 1.4450 and 1.4228.

USD/JPY: After February rally above key resistances at 78.35 and 79.50 were UP Breaks, and holding them on extended correction led to a much more major confirmation of the overall UPturn. Above 84.00-.50 and 85.54-.94 led to violation of more critical 87.50-.00 area that was also top of channel UP Acceleration, and above 91.00 has led to test of 93.80-95.00 interim Objective. 91.00-90.00 remains support with 100.00 next Objective.

AUD/USD: Commodity currency less than impressive on failure below 1.0450-1.0500 after stallout into resistance in 1.0600 area. Both MACDs now DOWN, and failure back below 1.0350 interim left now violated 1.0250 critical support this side of the major .9800 area.

Foreign Exchange: Cross Rates: Euro currency weakness had limitations based on the support expectations furthered by ECB President Draghi and the Fed's major QE efforts. So return to strength after January ECB meeting 'lack of crisis' confidence no surprise. That was reversed by recent signals of Euro-zone weakness, and especially Italian election question over commitment to continued fiscal and labor reforms. Post-election policy-driven yen weakness will likely still be in force as well with greenback strong.

March Crude Oil: Push back above 95.50-94.50 stallout into 97.50-98.00 left it a trading range market until last week's equities-inspired failure. Weekly MACD UP yet daily clearly DOWN means the levels are more important, with 93.00-92.50 now under attack.

April Gold: Swinging above and below last September 1,675 UP Break means that area has now been technically 'erased' as a key decision level. Significant resistance is now congestion in 1,700 area, yet overall daily downward channel from last October's high has Accelerated DOWN below the 1,590 return line, even if the reaction has carried back above it on equities weakness and European disruption. Back below major mid-2012 congestion beginning at 1,630-25 area leaves that resistance, with various support levels all the way down to major 1,530 May 2012 low. Watch equities and Europe for now.
