Technical Projections and select comment

(as of the Wednesday, April 10, 2013 US Close)

Equities: DJIA (cash): Strong sister holding above 14,350 on Friday selloff set the stage for strong rally. Yet even with all signals UP, now approaching much heavier resistance.

RES: 14,925; 15,440 (JAN '99 hi OSC); 15,660 (inferred OSC ext.)

SUPP: 14,790 (OSC); 14,685; 14,550; 14,380-50; 14,198 (old high)

June S&P 500 Future: Drop from 1,568 high looked bad, but Friday 1,547 DOWN Break being Negated was sign of strength. Extended oscillator resistance into 1,590-95 area.

RES: 1,586.50 (all-time high); 1,590-95; 1,610; 1,625; 1,640

SUPP: 1,573.50; 1,568-65; 1,550-52; 1,547-45; 1,532; 1,526-22

DAX (cash): Weak sister in wake of various Euro-problems still squeezed back above 7,750 area, also weekly MA 9 & 13. MACDs both DOWN with upper 7,800 resistance.

RES: 7,940; 7,885; 8,030; 8,100-17; 8,151.87; 8,227 & 8,540 (OSC)

SUPP: 7,740-50; 7,660-83; 7,600 (May '11 hi); 7,523; 7,400-50

FTSE 100 (cash): More resilient sister relative to Europe better bounce from 6,210, but 6,445-75 prominent now with both MACDs back roughly in balance. Weekly MA-13 6,346.

SUPP: 6,377; 6,330-00 (NEG DN Brk); 6,275; 6,230-10; 6,100-6,076

June NIKKEI Future: 12,600 now support after surge above it, which was also oscillator resistance. Indicators UP, and extended oscillator resistance into 14,000 and 14,600.

RES: 13,500; 13,660; 13,800; 13,950-14,000; 14,325; 14,620

SUPP: 12,950-13,080; 12,600; 12,345; 12,200; 11,620; 11,500

Government Bond Futures: Recent push higher on European troubles was impressive, and weakening of even US economic data supports the resilient holding near top of rally. However, anticipatory rally on weak data meant govies have limited further upside, as we expected. Yet even so, upside leader June Bund and others have held in very well so far due to continued weak data, even if continues to drive the equities QE focused rally. Next lower supports likely to hold as long as June S&P future tops into 1,590-95 area.

Technical Projections and select comment

(as of the Wednesday, April 10, 2013 US Close)

December 2013 Short Money Forward Futures: What can say? Since early 2011 short money contracts had great UPSide run defying all the central bank hike opinions. That's the history of deep discounts in forwards, even as rally sputtered on renewed strength of the equities on QE influences. However, the more important decision now evolves to the relative expectations for real world yields instead of base rate expectations. And that means more than just Italian election disruptive influences and Cyprus in Europe, with weaker US data in mix. That is reflected in Short Money forwards' sustained strength in spite of US and Japanese equities rally. Even before that LTRO reimbursements to ECB below estimates, indicating concerns about remaining fragility of European economy.

USD INDEX: Now restrained on euro's short term recovery, even of yen weakness is underpinning all other currencies. Yet strength elsewhere seems a bit more of a 'risk-on' rally, which leaves the trend hostage to equities decision into higher resistance. It is reinforced by weekly MA-9 up into bottom of .8225-60 with daily MACD still DOWN.

**RES: .8300; .8335-55; .8450; .8516; .8625-36; .8695; .8750; .8825-70

EUR/USD: While major 1.3450-1.3550 resistance temporarily violated, spill back below it was a fresh DOWN Break with both MACDs DOWN. While daily back UP since push back above 1.2860, weekly MA-13 reinforces 1.3170-1.3200 resistance. As this seems a modest 'risk-on' squeeze, quite a bit of next swing decision may rest with the equities trend.

GBP/USD: Much as with EUR/USD above 1.2500-1.2450, the August push above 1.5750 key weekly MA's, Fibonacci and congestion led to a full extension to major 1.6300 area. Yet serial failures below 1.6000-1.5950, 1.5750 and 1.5500-1.5450. Yet now back above 1.5000-1.4950 and 1.5268-33 multi-year lows could lead to retest of 1.5500-1.5450 area.

USD/JPY: February 2012 rally above key 78.35 and 79.50 were UP Breaks, and holding them on extended summer correction led to a much more major UPturn. Above 84.00-.50 and 85.54-.94 led to violation of critical 87.50-.00 area top of channel UP Acceleration. Violation of the 93.80-95.00 Objective reinstated by last week's extension above it in the wake of BoJ aggressive QE acceleration. 100 now hit with 105 next major Objective.

AUD/USD: Commodity currency less than impressive on failure below 1.0450-1.0500 after stallout into resistance in 1.0600 area. But daily MACD back UP on rally above 1.0350 was also UP Break, followed by UP Break above 1.0450-1.0500, with 1.0625 critical threshold.

USD/CHF: Repeated previous holds at .9250 Fibonacci reinstated after February recovery led to failed test of mid-.9500 resistance. Back down below .9400 and holding back into .9300 congestion also weekly MA-13. Even so, only violation of .9250 is a full failure.

Foreign Exchange: Cross Rates: Euro currency weakness was back as dominant secular trend in the wake of Cyprus problems and inability to form Italian government. The return to strength after January ECB meeting 'lack of crisis' confidence was no surprise, yet masked the broader issues which still plague Euro-zone banks. And yet, post-election policy-driven Japanese yen weakness still in force with greenback strong. That technical trend still major focal point after new BoJ Governor Kuroda's first meeting last Thursday.

Foreign Exchange: Cross Rates: (continued)

EUR/GBP: Pound lost strong sister status since mid-November in spite of repeated euro failures at .8150 resistance. January ECB meeting confidence-led push above .8250-70 fed rally above .8370-.8400 DOWN Break, and as expected that is now key support.

May Crude Oil: February failure below 95.50 and 94.30-.00 was completely reversed on equities and economic recovery until last week. Now 94.30-.00 critical with weekly and daily MACD both mostly in balance. Watch US equities decision into nearby resistance.

Significant resistance now major weekly downward channel (from last October's high) DOWN Acceleration below the 1,590 return line, so not a huge surprise it stalled there on sharp rally into Tuesday. All indicators still DOWN as it weakens toward retest of 1,547 congestion; even if 1,530-26 far more major.
