Equities: DJIA (cash): Strong sister drop back below 14,685 pretty ugly, with daily MA resistance into that area now. 14,380 now critical into weekly MA-13 and MACD influence.

DAX (cash): Weak sister in wake of various Euro-problems still squeezed back above 7,750 area last week only to implode this week. 7,380 key weekly MA-41 and Fib support.

Government Bond Futures: Recent push higher on European troubles was impressive, and weakening of even US economic data supports the resilient holding near top of rally. However, anticipatory rally on weak data meant govies had limited further upside, as we expected. Yet even so, upside leader June Bund and others have held in very well so far due to continued weak data, and whether they get through major resistance will likely be determined by whether equities melt down into weekly Close, or rebound to resistance.

December 2013 Short Money Forward Futures: What can say? Since early 2011 short money contracts had great UPSide run defying all the central bank hike opinions. That's the history of deep discounts in forwards, even as rally sputtered on renewed strength of the equities on QE influences. However, the more important decision now evolves to the relative expectations for real world yields instead of base rate expectations. And that means more than just Italian election disruptive influences and Cyprus in Europe, with weaker US data in mix. That is reflected in Short Money forwards' sustained strength in spite of US and Japanese equities rally. Even before that LTRO reimbursements to ECB below estimates, indicating concerns about remaining fragility of European economy.

USD INDEX: Now restrained on euro's short term recovery, even of yen weakness is underpinning all other currencies. Yet strength elsewhere seems a bit more of a 'risk-on' rally, which leaves the trend hostage to equities decision into noted critical supports. It is reinforced by weekly MA-13 up into .8180 area next week with daily MACD still DOWN.

**RES: .8300; .8335-55; .8450; .8516; .8625-36; .8695; .8750; .8825-70

EUR/USD: While major 1.3450-1.3550 resistance temporarily violated, spill back below it was a fresh DOWN Break with both MACDs DOWN. While daily back UP since push back above 1.2860, weekly MA-13 reinforces 1.3170-1.3200 resistance. As this seems a modest 'risk-on' squeeze, quite a bit of next swing decision may rest with the equities trend.

GBP/USD: Much as with EUR/USD above 1.2500-1.2450, the August push above 1.5750 key weekly MA's, Fibonacci and congestion led to a full extension to major 1.6300 area. Yet serial failures below 1.6000-1.5950, 1.5750 and 1.5500-1.5450. Yet now back above 1.5000-1.4950 and 1.5268-33 multi-year lows could lead to retest of 1.5500-1.5450 area.

USD/JPY: February 2012 rally above key 78.35 and 79.50 were UP Breaks, and holding them on extended summer correction led to a much more major UPturn. Above 84.00-.50 and 85.54-.94 led to violation of critical 87.50-.00 area top of channel UP Acceleration. Violation of the 93.80-95.00 Objective reinstated by recent extension above it in the wake of BoJ aggressive QE acceleration. 100 now hit with 105 next major Objective.

AUD/USD: Commodity currency less than impressive on failure below 1.0450-1.0500 after stallout into 1.0600 area resistance. Daily MACD back DOWN failure of 1.0350 UP Break looks weak in wake of weak Chinese and US data. 1.0450-1.0500 resistance once again.

USD/CHF: Repeated previous holds at .9250 Fibonacci reinstated after February recovery led to failed test of mid-.9500 resistance. Back down below .9400 and .9300 congestion is also weekly MA-13. Even so, only violation of .9250 is failure. .9100 area next support.

Foreign Exchange: Cross Rates: Euro currency weakness was back as dominant secular trend in the wake of Cyprus problems and inability to form Italian government. The return to strength after January ECB meeting 'lack of crisis' confidence was no surprise, yet masks the broader issues which still plague Euro-zone banks. And yet, post-election policy-driven Japanese yen weakness still in force with greenback strong. That technical trend still major focal point after new BoJ Governor Kuroda's first meeting last Thursday.

Foreign Exchange: Cross Rates: (continued)

EUR/GBP: Pound lost strong sister status since mid-November in spite of repeated euro failures at .8150 resistance. January ECB meeting confidence-led push above .8250-70 fed rally above .8370-.8400 DOWN Break, and as expected that is now key support.

June Crude Oil: Negativity of failure below 95.50 and 94.30-.00 was only exceeded by the gap back below 92.05 gap. All related to economic weakness, so watch equities for s.t. trend decision. Major support into 85.00-84.50, with Tolerance to 84.05 eight month low.

June Gold: Mid-February major weekly downward channel (from last October's high) DOWN Acceleration below the 1,590 return line finally caught up with the yellow metal, in spite of the extended (albeit quiet) reaction back above it in the second half of March. It is not a huge surprise that once it knocked out 1,547 congestion and more major 1,530-26 19-month lows end of last week it was vulnerable to a slide toward long term support in the upper 1,200 area. In the meantime, 1,431-28 also bottom of Monday's gap down.
