Technical Projections and select comment

(as of the Wednesday, May 1, 2013 US Close)

Equities: DJIA (cash): Strong sister back to 14,685 pretty ugly, but right daily MAs now support right around today's Close. 14,550 next lower support with daily MACD critical.

SUPP: 14,685; 14,550; 14,380; 14,198 (old high); 14,050-00; 13,960

June S&P 500 Future: Drop back below 1,568 was critical with sag all the way to 1,332, yet back above it the 1,573 support now s.t. critical. Weekly MACD critical on that as well.

RES: 1,582 (gap); 1,588-1,592.50 (gap/old high); 1,605 & 1,635 (OSC)

SUPP: 1,573; 1,568-65; 1,550-52; 1,547-45; 1,532; 1,526-20; 1,510-05

DAX (cash): Weak sister in wake of various Euro-problems still squeezed back above 7,750 area weekly MAs last week. Major lower support still down around the 7,500 area.

RES: 8,030; 8,100-17; 8,151.87; 8,327 & 8,430 (OSC)

SUPP: 7,885; 7,940; 7,740-50; 7,660-83; 7,600 (May '11 hi); 7,523

FTSE 100 (cash): Strong sister to Europe still stalled on rally, and very similar to DAX on recovery back above 6,400 area weekly MAs. Major lower support still in low 6,200 area.

SUPP: 6,420; 6,377; 6,330-00 (NEG DN Brk); 6,275; 6,230-10

June NIKKEI Future: 13,500 support after surge above it, also s.t. oscillator threshold and daily congestion and MA 18. Weekly MACD UP, but daily DOWN could mean correction.

RES: 13,950-14,000; 14,325; 14,620; 15,000; 15,250; 15,550; 16,150

Government Bond Futures: Push higher on weak economic data was impressive, and weakening of even US economic data supports the resilient holding near top of the rally. However, anticipatory 'hostage to fortune' rally on weak data means govies have limited further upside unless the equities begin to show some weakness once again. Even so, upside leader June Bund and others have held in very well so far, and whether they get through major resistance will likely be determined by whether equities weaken further into weekly Close after ECB press conference Thursday and US Employment on Friday.

Technical Projections and select comment

(as of the Wednesday, May 1, 2013 US Close)

December 2013 Short Money Forward Futures: What can say? Since early 2011 short money contracts had great UPSide run defying all the central bank hike opinions. That's the history of deep discounts in forwards, even as rally sputtered on renewed strength of the equities on QE influences. However, the more important decision now evolves to the relative expectations for real world yields instead of base rate expectations. And that means more than disruptive Euro-zone political influences, with weaker US data in mix. That is reflected in Short Money forwards' sustained strength in spite of equities rally. The Euro-zone data is now weak enough to create anticipation of ECB easing on top of the other major central bank (sans Australia) aggressive quantitative easing.

USD INDEX: Now restrained on euro's short term recovery, even of yen weakness is underpinning all other currencies. Yet strength elsewhere seems a bit more of a 'risk-on' rally, which leaves the trend hostage to equities decision into noted critical supports. It is reinforced by drop below weekly MA-13 up into .8180-50, with next support .8080-50 area.

RES: .8225-60; .8300; .8335-55; .8450; .8516; .8625-36; .8695; .8750

EUR/USD: While major 1.3450-1.3550 resistance temporarily violated into February, spill back below it was a fresh DOWN Break. Daily back UP since push back above 1.2860, and above weekly MA-13 reinforces critical nature of 1.3170-1.3200 resistance. As this seems a modest 'risk-on' squeeze, quite a bit of decision may rest with equities trend.

GBP/USD: Much as with EUR/USD above 1.2500-1.2450, the August push above 1.5750 key weekly MA's, Fibonacci and congestion led to a full extension to major 1.6300 area. Yet serial failures below key 1.5233 and 1.5000 area looked ugly. Now back above the 1.5500-1.5450 area is critical indication, with next resistance at 1.5700 DOWN Break.

USD/JPY: February 2012 rally above key 78.35 and 79.50 were UP Breaks, and holding them on extended summer correction led to a much more major UPturn. Above 84.00-.50 and 85.54-.94 led to violation of critical 87.50-.00 area top of channel UP Acceleration. Violation of the 93.80-95.00 Objective reinstated by recent extension above it in the wake of BoJ aggressive QE acceleration. 100.00 now hit with 105.00 next major Objective.

AUD/USD: Commodity currency less than impressive on failure below 1.0450-1.0500 after stallout into 1.0600 area resistance. Daily MACD back DOWN on 1.0350 UP Break failure looks weak in wake of weak Chinese and US data. 1.0450-1.0500 resistance once again.

USD/CAD: Back above 1.00 area congestion and weekly MA-41 since late January led to push back above 1.0100-1.0085 Negated UP Break previous failure, yet with continued topy feeling into 1.0270-1.0300 a question, even if 1.00 area MA-41 still strong support.

USD/CHF: Repeated previous holds at .9250 Fibonacci reinstated after February recovery led to failed test of mid-.9500 resistance. Back down below .9400 and .9300 congestion is also weekly MA-13. Even so, only violation of .9250-20 is failure. .9100 area next support.

Foreign Exchange: Cross Rates: Euro currency weakness was back as dominant secular trend in the wake of Cyprus problems and inability to form Italian government. The return to strength is now a reflection of better general global economic conditions on the back of so much massive central bank QE. Is that actually a rational expectation? Maybe yes, and maybe not. But the anticipation of easing by the ECB would normally weaken the euro if it were not. In any event, policy-driven Japanese yen weakness still in force.

EUR/GBP: Pound regained strong sister status since mid-March general basing after the long slide. Repeated euro failures at .8800 resistance led to slippage below .8600 as well, and with weekly MACD just DOWN the .8400 support critical this side of upper .8100 area.

Energy & Gold

June Crude Oil: Negativity of early April failure below 95.50/94.30-.00 was only exceeded by gap back below mid-92.00 area. All related to economic weakness, so watch equities for s.t. trend decision. Major support into 85.00-84.50 not quite hit on last sharp selloff.

June Gold: Mid-February major weekly downward channel (from last October's high) DOWN Acceleration below the 1,590 return line finally caught up with the yellow metal, in spite of the extended (albeit quiet) reaction back above it in the second half of March. It is not a huge surprise that once it knocked out 1,547 congestion and more major 1,530-26 19-month lows it was vulnerable to a slide toward long term support in upper 1,200 area. Back above 1,431-28 bottom of major gap down makes it s.t. support on current selloff.
