Equities: DJIA (cash): Stallouts into 15,250 area respect daily MA resistance for now, yet holding upper 14,000 area keeps weekly MACD UP, and is now also key weekly MA-13.

RES: 1,620; 1,640-1,635; 1,645-48; 1,660; 1,666-73 (DN CPR & OBJ)

SUPP: 1,610; 1,606-1,594 (R-gap high); 1,688; 1,576-73; 1,563

DAX (cash): Strong sister in Europe wicked chop on the reaction tested 8,000-7,900 area Fib, weekly MA and congestion. As with others, weekly MACD UP signal is now critical.

SEP NIKKEI Future: Even though vigorous 12,500 tests appear weak, still key Fibonacci level. Yet weekly MACD DOWN puts more pressure on bulls for a sustained recovery.

Government Bond Futures: Push higher on weak economic data was impressive, and previous weakening of even US economic data supported resilient holding near top of the rally until May US Employment report. Subsequent Fed vacillation on future path of QE affected overall psychology. That was evident in limited bounce on recent equities weakness, and attempted DOWN Breaks below trend supports. Rationale for govovies holding improved with lackluster equities rally and European economic data weakness.

December 2013 Short Money Forward Futures: What can we say? Since early 2011 short money contracts had great UPside run defying all the central bank hike opinions. That's the history of deep discounts in forwards, even as rally sputtered on strength of the equities on QE influences. However, the more important decision now evolves to the relative expectations for real world yields instead of base rate expectations. And that depends on whether we see more weak Euro-zone economic influences, with some weaker US data now in the mix. That's reflected in Short Money forwards rallying back a bit after weaker performance on hints of central bank accommodation withdrawal. If it is going to amount to anything may be clearer after FOMC/Bernanke show on Wednesday.

USD INDEX: While encouraged by euro short term weakness and also Aussie dollar and continued yen softness, euro strength has reversed recent greenback up trend. It was interesting to see daily MACD DOWN reinforcing weakness back below .8335-55 area that led to debacle below .8133 May low. Next support is now .8000 late January DOWN Break.

RES: .8150-80; .8225-60; .8300; .8335-55; .8450; .8516; .8625-36

EUR/USD: While major 1.3450-1.3550 resistance temporarily violated into February, spill back below it was a fresh DOWN Break. Daily MACD back UP since push above 1.2860, and above weekly MA-13 in the 1.3000 area reinforce renewed strength. Weekly MACD UP on follow through above 1.3250 resistance now points to likely test of 1.3450-1.3550.

GBP/USD: Serial failures below key 1.5233 and 1.5000 area looked ugly, with failure after squeeze above 1.5500-1.5450 area. Yet, the firm holding activity against the 1.5000 area was positive sign, and once again above the 1.5500 area leaves 1.5700 critical resistance.

USD/JPY: Even with BoJ aggressive QE acceleration there was likely only so far the yen can go in the wake of the JGB debacle finally weighing on the mighty NIKKEI. After it fell below the next major level at 101.45 it was ready for the extended correction below 100 and 99 areas. Now back below 95.00, yet with 93.50-.00 key Fib & congestion support.

AUD/USD: Commodity currency less than impressive on failure below 1.0450-1.0500 after stallout into 1.0600 area. Daily MACD back DOWN on DOWN Break below .9850-00, which fed failure below .9581-37 major low and washout below major .9388 low prior to bounce.

RES: .9581-37 (MAY '12 low); .9850-10; 1.0000-.9950; 1.0150-00

SUPP: .9388 (OCT '11 low); .9175; .8927; .8867; .8770; .8578-54

USD/CAD: Back above 1.00 area congestion and weekly MA-41 since late January led to push back above 1.0100-1.0085, and 1.00 still support on recent selloff. Even weakness back below 1.0270-1.0300 has plenty of support in that area and even back down at 1.00.

RES: 1.0270-1.0300; 1.0450; 1.0500-25; 1.0658-81; 1.0750; 1.0854-72

USD/CHF: Repeated previous holds at .9250 Fibonacci reinstated after February recovery led to MAR-APR failed test of mid-.9500 resistance. Now the 'refail' below .9550-00 makes .9250 support on reaction with .9200 area Tolerance; .9050-20 next major lower support.

RES: .9780-.9800; 1.0000-1.0067; 1.0300-58; 1.0600-50

Foreign Exchange: Cross Rates: Euro currency weakness reversed now, yet no dominant secular trend in wake of continued weak economic data weighing on Australian dollar; and that raises questions about the real condition of the Chinese economy. It is a bit of a surprise there was no strength there on equities trend seeming to signal better general global economic conditions. As noted previous, that is 'Irrational Lack of Exuberance'. Policy-driven Japanese yen weakness still in force in spite of recent reaction, and that also highlights the weakness of Asia, where the Aussie is even leading the yen down.

Foreign Exchange: Cross Rates: (continued)

EUR/GBP: Pound regained strong sister status since mid-March general basing after the long slide. Repeated euro failures at .8800 resistance led to slippage below .8600 as well; with weekly MACD DOWN, the .8400 support still critical this side of upper .8100 area.

Energy & Gold

August Crude Oil: Negativity of early April failure below 95.50/94.30 was only exceeded by gap back below mid-92.00 area. Back above that continued challenge of 97.50-98.00 key resistance very interesting in wake of equities weakness. Both MACDs UP now.

RES: 97.50-98.00; 99.40; 100.00-.42 (09/12 hi); 101.65-.25

SUPP: 95.00-.50; 92.50-.00; 92.05 (gap); 89.50-90.50; 88.00-87.77

August Gold: Mid-February major weekly downward channel (from last October's high) DOWN Acceleration below the 1,590 return line finally caught up with the yellow metal, in spite of the extended (albeit quiet) reaction back above it in the second half of March. It is not a huge surprise that once it knocked out 1,547 congestion and more major 1,530-26 19-month lows it was vulnerable to a slide toward long term support in upper 1,200 area. Holding around 1,355 March low looks good now, yet lack of strength on the bounce is a concern after weekly chart major channel 1,387 DOWN Acceleration (worth watching.)

RES: 1,412-02; 1,431-28; 1,478-71; 1,500; 1,530-26 (18-mo lows)
