(as of the Monday, June 23, 2014 US Close)

Equities: DJIA (cash): Previous upside leader a bit sluggish into minor new all-time high. Yet trend is definitely still UP, after s.t. washout below 16,800-756 congestion support.

RES: 16,978 (high); 17,165 (OSC); 17,495 & 17,590 (topping lines)

SUPP: 16,800-756 (prev. all-time hi); 16,630; 16,350-90; 16,500-450;

SEP S&P 500 Future: Negating previous 1,883-87 resistance led to Runaway Gap weekly opening above 1,904 (post-Memorial Day opening low.) That set an Objective at 1,938. SEP contract push above it last Wednesday strong. Key resistance now 1,967 top-line.

RES: 1,960-67 (OSC & topping line); 1,985-90 & 2,015 (OSC)

SUPP: 1,942-47; 1,938 (R-Gap Objective); 1,923.80 (prev. all-time hi)

DAX (cash): Fellow strong sister reinvigorated by ECB QE expectations also gapped to all-time high 4 weeks ago. Stalled near oscillator levels above 10,000 a problem for now.

RES: 9,992 (prev. all-time hi); 10,051 (high); 10,095 & 10,325 (OSC)

SUPP: 9,822-10 (R-Gap); 9,755 (NEG DN CPR); 9,590-9,620; 9,540-00

FTSE 100 (cash): Weak sister repeated stall against mid-May 6,880 daily DOWN CPR has led temporary slippage below upper-6,700 area. Low-6,700 area other key trend support.

RES: 6,820; 6,880 (DN CPR); 6,950 (all-time hi); 7,120 & 7,270 (OSC)

SUPP: 6,780; 6,710; 6,640-00; 6,575-40; 6,450-20; 6,380; 6,330-00

SEP NIKKEI Future: Ultimate weak sister finally pushes back above 14,650 and 14,750 on better data and other equities influence. Resistance above 15,250 remains 15,350-430.

RES: 15,350-430; 15,700; 16,200-270; 16,430 (DEC high)

SUPP: 15,250; 15,000; 14,650-750; 14,500; 14,350; 14,250-200

Government Bond Futures: Govvies excelled on weaker late May economic data in spite of equities rally. Bund and other govbies didn't even need 'haven' influences four weeks ago to test major resistances (T-note 126-24, Gilt 112.00 area, Bund 147.00 area) in wake of dovish central bank tone. Yet they are vulnerable on quarterly futures expiration rollover with September contracts below key lead contract supports (T-note 124-24, Gilt 109.70 area even as Bund keeps bid above 144.50.) Critical whether the September T-note & Gilt futures can rally back above 124-24/125-00 and 109.70-110.00 areas (respectively.)

SEP T-note: RES: 124-24/125-02; 125-08 (gap); 125-16 (UP Break); 126-02/-10

SUPP: 124-05/-02; 123-16; 123-04/-00; 122-27; 122-08; 121-24; 121-08

SEP UK Gilt: RES: 110.00- 109.70; 110.50; 111.10-.25; 111.75; 112.20; 113.20

SUPP: 109.30-.00; 108.65-.30; 108.00(Maj UP Brk)-107.75; 106.80-.65

SEP Bund: RES: 146.00 (SEP ctr prev. high); 146.50-.77; 147.12-.20 (all-time hi)

SUPP: 145.35-.50; 145.00; 144.50; 144.37; 144.00; 143.70-.50

June 2015 Short Money Forward Futures: Well, with not just the lead contract June futures but all of the futures through most of 2014 reflecting the very likely base rate stagnancy at very low levels, it is obvious that the more broad-based trend 'anticipation' for the short money is only in the far forwards. The selection of the June 2015 futures was vindicated once again in the wake of the mid-March Hike Hysteria (similar to last May's Taper Tantrum) after Janet Yellen's "six month" misstatement. With inferences now that the Fed may be on hold for even longer than expected and the ECB already providing more accommodation at the June meeting, not much ground to expect a break. The exception is of course the Short Sterling damaged by the Carney Carnage. And yet, even there the BoE remains 'data driven', and this Friday's GDP numbers may be a key.

Foreign Exchange: US Dollar

USD INDEX: Even though it slid below .8000 on euro strength, it rallied back above it on the geopolitical concerns and once again on the Yellen Hike Hysteria. Radical swing in wake of ECB cuts saw an .8066 DOWN CPR, but that was quickly Negated. Tone good.

RES:	.8066-38 (DN CPR); .8100; .8148-52; .8210-25; .8267
SUPP:	.8006 (NEG UP Break); .7950; .7900; .7860-10; .7680-50; .7500

EUR/USD: Finally posting a weekly Close above 1.3836 Fib resistance was propitious for a move to 1.40-1.41. Weakness after the May ECB press conference brought 1.3750 major weekly channel DOWN Break. Dropping below 1.3600 interim support on ECB, it held 1.35 for a 1.36 UP CPR; that's now Negated, but still holding well on bounce back to that area.

RES:	1.3673; 1.3750-00; 1.3836-15; 1.40-1.41
SUPP:	1.3600 (NEG UP CPR); 1.3500-1.4377; 1.3425-00; 1.3295

GBP/USD: While it took a while, firm UK data supported rally extension above 1.6750 after stalling there since mid-February short-term DOWN CPRs. And the more hawkish expressions from BoE's Carney set it back up to test 1.7000-44 area. 1.7250 next res.

Foreign Exchange: US Dollar (continued)

USD/JPY: Back below May 103.30-.74 DOWN CPR and 102.90 Tolerance was critical failure that led to 102.25 'double' weekly channel DOWN Break. Yet held lower support into 101.25-100.75 lows, and critical after minor squeeze back above the 102.25 area.

RES: 102.25 (Double DN Break); 103.30-102.90; 103.75; 105.00-.50

SUPP: 101.25-100.75; 100; 99.20-98.80; 98.30; 97.60; 96.57

AUD/USD: Since the early year recovery breached the .9087 January rally high and more major .9240-.9300 resistance they have been good support. Yet the inability so far to push back above the .9400 UP Acceleration and .9450-63 resistance remains a problem.

RES: .9400 (UP Accel.); .9450-63; .9530; .9610-25; .9677; .9750

SUPP: .9380-60; .9300-20; .9240-00; .9170; .9135; .9050-87; .9000

USD/CAD: Push above 1.0750 resistance & 1.0850 major Fib retracement led to test of the 1.1250 major Fib level. Unable to rally from major channel support for last month led to 1.0890 DOWN Break last week. 1.0800 was Tolerance this side of 1.0730 Fib-congestion.

RES: 1.0840-72 (Fib); 1.0890 (DN Break); 1.0940-00; 1.1000-30;

SUPP: 1.0750-30; 1.0650-00 (Fibs); 1.0557; 1.0500-1.0460; 1.0400

USD/CHF: Heavier September failure below .9250 Fibonacci and congestion fed drop below .9000. And the early year push back above failed to get near .9250. Failure of .8840 UP Break was bearish but now reversed, with .9000 higher res. with .9038 Tolerance.

RES: .9000; .9038; .9125-58; .9250; .9370-.9422

SUPP: .8930; .8865-80; .8840-55 (NEG UP Brk); .8780-50

Foreign Exchange: Cross Rates: Obvious influence was ECB continued accommodative rhetoric seeming to indicate some QE potential that came to fruition at the last meeting. That could only bring further secular weakness onto the euro as the other currencies remain stronger against the greenback. That is very consistent with QE taper focused Fed policy, yet with rates remaining very low on 'redirection' of Ms. Yellen's mid-March 'six month' Q&A comment; and she remained passingly dovish as expected at last Wednesday's press conference. So not much of a surprise that US dollar firming against other currencies was passing versus more sustained (if modest) strength against euro.

Foreign Exchange: Cross Rates: (continued)

EUR/GBP: Pound regained strong sister status since last summer. Even after early March recovery above .8350, failure below .8300-.8280 set bear back on track to break .8150-30. And finally reached .8000-.7950 next major support in the wake of recent BoE influences.

RES: .8000; .8035; .8085; .8150-30; .8190-75; .8303-.8280; .8350

Energy & Gold Futures

August Crude Oil: Mideast instability and better economic data bull drivers. Now also likely encouraged by summer driving season, Russia-Ukraine or other geopolitical risks still buffer any dip, especially with 104.23-.95 gap higher; that is now short term support.

RES: 107.50; 108.90-109.44; 110.70; 112.62

SUPP: 105.22; 104.95; 104.23-.50; 103.50-.00; 102.25-.68; 101.00

August Gold: February 2013 major weekly downward channel (from last October's high) DOWN Acceleration below the 1,590 return line finally caught up with the yellow metal, in spite of extended reaction back above it in second half of last March. June 2013 slide below 1,302 monthly channel on a DOWN Break and 1,278 Fib support was Negated last July, and that is a good reason technical retests had seen strong rebound rallies since. Recovery from below that area again answers question of whether it was last gasp selloff into the ultimate real bottom. Love that Yellen: back above 1,300 looking good again.

RES: 1,331; 1,350-41; 1,360; 1,378; 1,420; 1,431-28; 1,350-41; 1,360

SUPP: 1,317-00; 1,285; 1,278; 1,263-61 (OCT low & gap); 1,240; 1,212
