Subject: ROHR TREND ALERT!!

Dear Alert Service Subscriber,
This is a critical short-term view:

As noted for the past couple of days, MARCH S&P 500 FUTURE below the far more major 2,020-10 range had critical lower support into the late 2014 into early February 2015 1,975-70 congestion.

As also noted previous, each of the previous slides below that area (during August and September) overran interim supports in the 1,960 and 1,930 areas to at least the 1,900 area and sometimes well below.

As such, it would appear after this morning's hefty gap lower opening that any MARCH S&P 500 FUTURE rally back to (or even near) the 1,975-70 area is likely to be met with selling, especially if it fails to fully close off the gap above the market back to Wednesday's 1,971.30 low.

NOTICE: The Rohr International, Inc. research team or its principals may already have entered positions or have orders working based on this view.
