Subject: ROHR TREND ALERT!!

Dear Alert Service Subscriber,
This is a critical short-term view:

As noted last Thursday morning, Super Mario (Draghi) has confirmed that inflation is weak for reasons beyond the sheer drop in Crude Oil prices (which he still allowed was enough in itself to affect near term inflation readings.) This is important, as it indicates the ECB is worried about the dreaded 'second round effects' that would cause the ECB to pursue more extensive Quantitative Easing (QE.)

And anticipation of that further accommodation was a fillip for the US equities and even energy markets that recovered so markedly from the lows after lunch (US time) on Wednesday. That was also a significant influence into **Thursday morning when all of that bullish anticipation was confirmed at the ECB press conference, That caused the MARCH S&P 500 FUTURE to sustain strength not only back up into but also well above the key 1,860-65 area.**

Here's the critical consideration today: MARCH S&P 500 FUTURE gapping below major trend support in the 1,865-60 range last Wednesday morning only to recover back up into and above it leaves that area as key support once again.

That is due to it being a Negated DOWN Break for now, Yet it also saw a short term down channel 1,959 UP Break Thursday morning, and Friday's gap higher from Thursday's 1,861 Close reinforces it as support as well.

As such, while it stalled into the 1,900 area both early and again late on Friday, the next dip to 1,865-60 is very likely to hold for all of those technical reasons. And as recent trading has amply demonstrated, there is not much between 1,900 area and 1,865-60.

While we still believe it is a bear market, it can now react back up to higher resistances as long as it holds 1,865-60. Those remain in the classical areas into interim 1,900 (already tested), 1,925-32 and 1,958-60 areas, with the more major resistances back up at 1,970-75 and even possibly the 2,010-20 areas.
