Subject: ROHR TREND ALERT!!

Dear Alert Service Subscriber,
This is a critical short-term view:

As noted of late, the overall soft global economic data remains while US data has improved to a goodly degree ever since last Thursday morning's strong US Durable Goods Orders. This continued into Wednesday afternoon's reasonably 'solid' Fed Beige Book release and the still weakish offshore data this morning (especially Chinese and UK Services PMI's and other UK data.)

This reinforces the degree to which the **MARCH S&P 500 FUTURE** rally extension on Wednesday was **clearly now part of a 'Goldilocks' rally: weak offshore data restrains the Fed right into the improved US economic indications.** While this has been true since last week, the reason we highlighted it yesterday was the Federal Reserve Beige Book release at 13:00 CST.

The continued strength of the equities now appears less a matter of 'Goldilocks and the Three Bears' than Goldilocks slays the bears.

Here's the critical consideration today: The key this morning is still that last Thursday's EQUITIES strength put the **MARCH S&P 500 FUTURE** back out above the 1,925-32 resistance, which put the burden of proof back onto the bears.

As noted on previous occasions, higher resistances were into the interim 1,950 area, and again at 1,958-62 area that was tested Friday morning prior to pulling back. Yet what was the worst the market could do on Monday? Only a retest of the Negated 1,925-32 resistance. And so it goes in bear market rallies: they go up when they can't stay down!!

Out above the interim 1,958-62 area on Tuesday morning it is important to note the next major resistances are 1,970-75 and 2,010-20. With the MARCH S&P 500 FUTURE now out above the lower of those, it becomes near term support, especially with Wednesday's low being only down to 1,967 that will now be the obvious Tolerance of that support.

That said, there are interim resistance levels at 1,986 (top of gap up to Wednesday January 6th Close) and the 1,995 bottom of another early January gap. **Yet with another relatively upbeat US Employment report expected Friday, it will likely be hard for it to remain down selloffs in front of it. There hasn't even been much of a dip since Monday's selloff temporarily retested the 1,932-25 area.**
