Subject: ROHR TREND ALERT!!

Dear Alert Service Subscriber,
This is a critical short-term view:

A bit later this morning, because we needed to see the full ECB post-rate decision press conference. And the rate decision was to further lower a couple of the key components along with the expansion of Quantitative Easing (QE) program. All of which was as accommodative as the EQUITIES expected.

In the wake of generally weaker economic data, that is very consistent with our ‘Goldilocks’ (‘not too hot, not too cold’) equities perspective. For much more on that see last weekend’s www.rohr-blog.com *Equities’ Goldilocks Psychology* post, which also includes the more forward looking negatives that likely keep equities a bear overall. (That is mostly open source, so you only need a FREE Silver echelon subscription to read the bulk of it.)

A concise overview of the negative factors that were explored at length in that post can be reviewed in our letter that the Letters Editor at the Financial Times was kind enough to post in the FTWeekend edition on Saturday at <http://bit.ly/1nnDW1B>.

Here’s the critical consideration today: MARCH S&P 500 FUTURE has indeed reflected the anticipated more accommodative stance from the ECB with a pre-opening swing above last Friday’s 2,007 US Employment report-inspired high. Yet in spite of the somewhat surprising aggressiveness of the ECB QE moves this morning, it only finally tested the low end of the 2,010-20 resistance prior to slipping back down to 1,996 area prior to pushing into the 2,000 area at present.

It will be very interesting to see if it can breach that early overnight 2,010 high, as that likely means it can proceed to higher levels like the top end of that resistance range at 2,020, or even higher levels like 2,035 or even 2,050. On the other hand, if it stalls at no better than 2,010 once again for too long, it can readily drop back down to the 1,995 or 1,986 areas once again.

And with the next central bank influence being a likely less hawkish FOMC next Wednesday, there is possibly even time for it to get back for the test of 1,975-70 that it failed to provide this week. Last Wednesday’s early 1,967 low is also remains the obvious Tolerance of that support.
