**Subject:** ROHR TREND ALERT!!

Dear Alert Service Subscriber,  
**This is a critical short-term view:**

**We seem to have an answer for the good question we posed Monday on whether the US EQUITIES could go from a “good news is good news” market to a “bad news is good news” market in less than one trading session If a key data set gets weak enough fast enough? The answer is “yes.”**

**After Friday’s very weak +38,000 Nonfarm Payrolls number saw the US EQUITIES hold key lower support and rebound, Janet Yellen’s Monday speech responded to that with a more circumspect view of when any future FOMC rate hike might take place. That seems enough for now to keep the bulls in control of the trend.**

**Here’s the critical consideration today: The June S&P 500 future pushed above the Tolerance of its daily Head & Shoulders Top at the 2,080 trading high (of the right shoulder) a week ago Wednesday. . Much above that (i.e. above the previous 2,085 congestion) the top was being Negated.** That is not only a near term positive sign. It also reversed the downside momentum since the 2,105 April 20th trading high of the overall rally saw it trade as low as the 2,035-32 area.

**In other words, the June S&P 500 future pushing above 2,080-85 was not just a violation of the next nominal resistance. It should set up a psychology that at least nominally extends the rally above 2,105.** It is therefore most interesting that after the very weak US Nonfarm Payrolls number on Friday it held right back in the 2,085 area once again.

**The burden of proof remained on the bears, and having failed to knock it through those supports (i.e. violated resistances) they are finally suffering with the next push higher. Now above the 2,105 previous high of the rally leaves the 2,120 mid-2015 congestion and 2,132 front month high of the overall rally as the next resistances.** Of note, that 2,132 level is also in line with a key weekly oscillator resistance, with next resistance not until the 2,155-60 area. For anyone already trading the September contract, all levels should be discounted by eight dollars.
