**Subject:** ROHR TREND ALERT!!

Dear Alert Service Subscriber,  
**This is a critical short-term view:**

**Fed Chair Yellen's speech at the Jackson Hole Policy Symposium Friday morning as well as additional comments from Mr. Fischer and Ms. Mester have once again put the Fed in a more hawkish psychology. Whether this will actually allow for a rate increase is much as the Fed itself: data dependent.**

**Yet as noted on Monday, the impact on US equities has been limited. Even though the market washed out on Friday after the various Fed speakers were finished, the Close was not below the Tolerance factor of the support (more below.) That left the bullish momentum intact, and Monday's still contained US Core Personal Consumption Expenditure data was enough to boost both equities and govies.**

**This is the critical consideration:**

The **September S&P 500 future** selloff at the beginning of this month Closed below 2,160-55. That looked like a window of opportunity for the bears. Yet as the US equities shook off their concerns and by later that week **September S&P 500 future** easily pushed back above that area. Interesting that this remained the lower congestion that the market held last Friday.

**And the key last week is that Oscillator resistance moving up to the 2,170-75 range (weekly MA-41 plus 125-130.) This set up another challenge for the bears. Just as recent temporary weakness below the bottom of short term trading ranges have not seen any follow through, the weakness below that range late last week was also short-lived.**

**After sagging back below the 2,185.00 area interim congestion, 2,170-75 was more important last week and remains so this week. Now that the market is back above it, the 2,165.50 trading low from two weeks ago is also reinstated as support. Next lower support remains that 2,160-55 area, as seen late last week.**

**As the weekly Oscillator resistance remains in the 2,170-75 area this week, the market climbing back above it is a friendly sign even if the more major resistance is still up at the next Oscillator threshold (MA-41 plus 160) in the 2,205 area.**
