Subject: ROHR TREND ALERT!!

Dear Alert Service Subscriber,
This is a critical short-term view:

Well, as noted Tuesday morning the verdict of neutral observers after Monday evening's US Presidential debate seems to be 'Advantage Clinton'. And we grudgingly agree.

While we are not at all convinced that Secretary Clinton's proposals on various fronts are the best way forward for the US and broader world, she won on points. That is due to sticking with the aggressive presentation of her program while she managed to accomplish her team's goal of baiting Donald Trump into being reactive to criticism rather than pushing his vision after the first 20 minutes.

The second was the inability of Mr. Trump to pounce on multiple openings where she was vulnerable when the debate came around to topics like cyber security, nuclear proliferation, and so on (Obamacare's burgeoning failure was never mentioned regarding the economic plight of the middle class) through many topics.

And the equity markets also finally recovered a bit on Tuesday, possibly on the realization that while not perfect, Clinton is the less disruptive alternative. That said, we caution against too bullish a view today, as there is a wave of Fed-speak from this morning through this evening that includes the most prominent hawks.

This is the critical consideration:

We have already reviewed at length the importance of the 2,160-55 area due to the lead contract S&P 500 future swings out of mid-July through early September.

As such, the previous December S&P 500 future violation of nominal early August 2,141.50 trading low support was telling, leading to the test of the more prominent 2,120 and 2,105-00 congestion areas that now remain major lower supports.

It is also relevant now that **December S&P 500 future stalled at no better than the 2,155 area** in early September and again on the rally in overnight trading into Tuesday morning. **Weakness back below 2,141.50 again was important**, as that was also the area it hung around last week prior to the FOMC decision, only strengthening once Chair Yellen provided more comfort in her press conference.

Yet as it held early Tuesday and is once again up into 2,155-60, that is the critical consideration now. Higher resistances remain 2,185-90 and the extended weekly Oscillator resistance that moved up to 2,220 this week (2,225 into next.)
