**Subject:** ROHR TREND ALERT!!

Dear Alert Service Subscriber,  
**This is a critical short-term view:**

**As we suspected, while Friday's US Employment report Nonfarm Payrolls coming in as expected at up 156,000 was a bit of a disappointment to the aggressive bulls, it actually was likely to their benefit. It was another 'Goldilocks' number in its less than aggressive gains, offsetting some of the recent fervor of the Fed hawks who had been encouraged by recent upbeat data.**

We believed it would keep the equities trend up on a **"bad (or at least somewhat soft) news is good news" central bank psychology.** Yet also as expected, **Friday's extensive Fed-speak featured some prominent hawks that allowed for pressure down to support** (see below) prior to the doves speaking after the US Close.

**This is the critical consideration (very similar to last week for now):**

**We have already reviewed at length the importance of the 2,160-55 area due to the lead contract S&P 500 future swings out of mid-July through early September. And the December S&P 500 future has stalled on recent rallies from not too far above it. Last week reinforced it with repeated failures, especially early Friday that highlights its psychological importance in future trading. Next higher resistance**

**As far as lower supports, we once again note the previous December S&P 500 future violation of nominal early August 2,141.50 trading low support was telling, leading to the early September test of the more prominent 2,120 and 2,105-00 congestion areas that remain major lower supports. Yet more recently that 2,141.50 (with a bit of Tolerance) has proven to be more critical, as evidenced by it even holding on the Deutsche-driven selloff two weeks ago and especially again on multiple tests last week. That culminated with it holding the critical test last Friday after the US Employment report.**

**As such, those levels will remain important near term finesse thresholds until one of them is more definitively violated.** Higher resistances remain 2,185-90 weekly Oscillator and hefty congestion (and the lead contract 2,191.50 all-time August high), along with the extended weekly Oscillator resistance that moved up to 2,225 this week.
