**Subject:** ROHR TREND ALERT!!

Dear Alert Service Subscriber,  
**This is a critical short-term view:**

**Almost all of the heavier late week fundamental influences are now priced into the markets. As far as the US equities activity, as opposed to what transpired early Tuesday morning, they were able to push above the key weekly Oscillator band around last week's previous all-time high weekly Close.**

**And the economic data has also strengthened markedly from the softer early week indications. After Wednesday morning's OECD monthly Composite Leading Indicators came in very positive once again (you can access our marked-up version at: <http://bit.ly/2InMzsC>), Thursday's US Wholesale Sales were very much stronger than expected. In addition to President Trump's indication Thursday morning that the tax reforms which were suspected to have been delayed will be forthcoming in the next several weeks, all of the data have been positive.**

**Asian economic indications (especially Chinese Trade figures) and the UK Trade and Industrial Production data are reinforcing the renewed bid in the equities. After a somewhat higher than expected US Import Price Index and much stronger than expected Canadian Employment figures there is only US Preliminary Michigan Confidence left for the week. Not likely there will be anything in that which will reverse the recent stronger psychology.**

**This is (still) the critical consideration:**

**Due to sustained aggressive increases in weekly MA-41 (as it loses old lower Closes from early 2016 selloff) March S&P 500 future extended weekly Oscillator levels are still moving up roughly \$5 each week. That extended lower support threshold was therefore up into the 2,263-68 range this week, rising to 2,268-73 next week. That will act as a buffer on any retest of the previous old all-time high.**

**And in line with overrunning higher weekly Oscillator resistance in the 2,279-84 area two weeks ago, that moved up to 2,289-94 this week and will rise to 2,294-99 next week. Of course, that will also be just below the previous January 26th 2,299.50 all-time trading high. And below that is the 2,278.25 area that was the previous all-time trading high (set by the December contract) that was exceeded again late last week. As the market maintained the bid from near that lower support area (it just missed hitting on Wednesday's 2,281 low), the extended weekly Oscillator resistance is 2,225-30 this week, rising to 2,330-35 next week.**
