Subject: ROHR TREND ALERT!!

Dear Alert Service Subscriber,
This is a critical short-term view:

We are coming to you a bit earlier than usual in preparation for Fed Chair Yellen's first round of semi-annual Congressional testimony starting at 09:00 this morning (with more from the same time on Wednesday.) It is also the case that we have already seen today's important economic data. That has repeated the recent pattern of somewhat stronger indications out of Asia and the UK while Europe remains a soft spot. This is no surprise.

What was somewhat of a surprise was the strength of the US Producer Price Index. Along with Wednesday morning's pending CPI release that may affect the market psychology. That said, it has not affected the equities as yet, and even the govies have not extended their recent selloff. However, with Ms. Yellen on the stand over the next two days there is a chance that the prospect of a March FOMC rate hike becomes at least a bit more likely than the low probability currently indicated by the markets. And that might be the influence that triggers at least a short term downside reaction in the equities even if the overall trend is most likely to remain solidly bullish. We shall see... and hear.

This is (still) the critical consideration:

Due to sustained aggressive increases in weekly MA-41 (as it loses old lower Closes from the early 2016 selloff) **March S&P 500 future** extended weekly Oscillator levels are still moving up roughly \$5 each week. And in line with overrunning higher weekly Oscillator resistance in the 2,289-94 last week, that rises to 2,294-99 this week. Of course, is also just below the previous January 26th 2,299.50 all-time trading high.

And below that is the 2,278.25 area that is the previous all-time trading high (set by the December contract) that was exceeded again two weeks ago. And the market maintained the bid from near that lower support area last week (it just missed hitting it on Wednesday's 2,281 low.) The extended weekly Oscillator resistance above 2,300 area is 2,330-35 this week that has already been tested.
