**Subject:** ROHR TREND ALERT!!

Dear Alert Service Subscriber,  
**This is a critical short-term view:**

**We are not looking for much further market activity today in front of President Trump's address to Congress this evening at 21:00 EST (20:00 CST & 02:00 Wednesday GMT.) There might be a bit of weakness on profit taking.**

**Our expectation is there will be little market response to the speech unless there is a misstep. We are particularly interested in seeing him stick with discussion of his actual plans and their potential benefits for the US economy and society. The downside is if he slips into any negativity, especially toward the press which has been such a consistent target. If that should surface, it could also be a negative for markets that have been happy to anticipate the more positive aspects of Trump's lower tax and higher spending agenda.**

**That upbeat psychology is also consistent with quarterly OECD International Trade Statistics that were released earlier this morning (with our marked-up version available at <http://bit.ly/2moSfYa>.) The improved trade activity (which had been a concern through 2015 into 2016) is another important sign that the current more upbeat 'risk-on' economic and equities psychology is likely justified.**

**This is (still) the critical consideration:**

**The equities found an excuse (likely weak US retailer indications into Friday morning) to get a bit of short-term jitters. As noted on Monday, that was very short-lived, with the lower support now remaining the same.**

**Due to sustained aggressive increases in weekly MA-41 (as it loses old lower Closes from the early 2016 selloff) March S&P 500 future extended weekly Oscillator levels are back to moving up roughly \$7 each week. Most important at present is the extended weekly Oscillator resistance above the 2,300 area rises to the 2,347-52 range this week. So it will be support again on any retest with some Tolerance below the previous week's 2,348 Close.**

**If it continues to maintain the rally from no worse than that area, the ultimate Oscillator threshold is up into the 2,377-82 range (weekly MA-41 plus 190-195) this week, with lower supports below the 2,350 area remaining into the interim 2,320 area and more major 2,300 area.**

**[For those of you who are subscribers, see the latest analysis and Market Observations write-up at [www.rohr-blog.com](http://www.rohr-blog.com) for more on the current trend evolution. Market Observations are available to Gold and Platinum subscribers.]**

**NOTICE: The Rohr International, Inc. research team or its principals may already have entered positions or have orders working based on this view.**

**Thanks for your interest.**

**This Current ROHR TREND ALERT!! will be available soon via the sidebar at [www.rohr-blog.com](http://www.rohr-blog.com) for Platinum echelon subscribers.**
