**Subject:** ROHR TREND ALERT!!

Dear Alert Service Subscriber,  
**This is a critical short-term view:**

**As noted last Thursday morning, Fed Day turned out to be quite the radical affair... and then again not so much. While it would have been unreasonable to expect a more hawkish indication from the FOMC and Fed Chair Yellen in the face of the current stall in the Trump reform agenda, evidently there were quite a bears (or unbought bulls) who were surprised... and bid the US equities up.**

**Yet with the full Trump agenda presently under the cloud of stalled healthcare reform, there is not yet any stronger growth bringing higher inflation. While it might seem a bit perverse, the US healthcare reform impasse is therefore of huge benefit to the Fed and Chair Yellen that wanted to remain more circumspect... as they have. While US equities are back down to pre-FOMC announcement levels on those concerns, that is also now support (see below.)**

**While there are quite a few additional economic data releases and central bank influences over the next day-and-a-half, the likely critical inflection point this week is Thursday's planned House vote on the initial phase of the Trump healthcare reforms. It might remain narrowly choppy until then.**

**This is (still) the critical consideration:**

**Due to sustained aggressive increases in weekly MA-41 (as it loses old lower Closes from the early 2016 selloff) June S&P 500 future (now front month) extended weekly Oscillator levels are back to moving up roughly \$7 each week. Most important at present is the extended weekly Oscillator resistance above the 2,300 area rises to 2,369-74 this week. That is also consistent with the recent 2,370 area congestion over-under the tested on Monday.**

**However, even if it fails back below the 2,370 area, the lower congestion supports and Oscillator areas are into the interim 2,350 and 2,320 congestion areas and the more major 2,300 area.**

**And if it resumes the trend higher from near-term support, the recent near term congestion is as nearby as the 2,380-82 area. Yet the ultimate Oscillator threshold is not until the 2,399-2,404 range (weekly MA-41 plus 190-195) this week. That is also consistent with the 2,401 front month S&P 500 all-time high. That sort of Oscillator extension has only been seen during extreme rallies like into early April 1999.**
