Subject: ROHR TREND ALERT!!

Dear Alert Service Subscriber,

Once again about “Hopes and Dopes” as it relates to dual Trump administration healthcare reform bill defeats last Thursday and Friday. As soon as it became apparent that it was going to be defeated (and instead was pulled by House Republican leaders) on Friday the US equities should have reacted as badly as we had projected; and finally did so temporarily Monday morning.

However, they have now bounced back from the test of the next key lower support (see below.) Much like the Thursday and Friday reactions, this seem like little more than the old adage that “Hope springs eternal.” Yet that hope seems capable of hanging the market up in the failed support range (see below), and that could last a while due to ongoing healthcare reform revival discussions.

As of now Congressional differences over more important tax reform measures do not need to be resolved with any bill specific bill as yet. So much like the healthcare reform process, there can be quite a bit of ‘happy talk’ about how the Republican Party’s diverse factions are going to agree on a unified program.

For more on the ‘devil in the details’ of those assumptions, www.rohr-blog.com subscribers should review our Tuesday evening *Commentary: Hopes and Dopes*. Suffice to say for now that there is a good question over whether tax reform confidence is just another round of ‘hope triumphs over reason’ (for now.)

This is (still) the critical consideration:

Due to sustained aggressive increases in weekly MA-41 June S&P 500 future extended weekly Oscillator levels were moving up roughly \$7 each week. Most important was the extended weekly Oscillator resistance above the 2,300 area rising to 2,369-74 last week.

As it failed back below the 2,370 area and interim 2,350 congestion last Tuesday, those were near-term resistance with the lower one being exceeded Thursday without quite reaching the higher area. Yet as we have pointed out for weeks now, lower congestion and trend supports and Oscillator areas are into the 2,320 congestion area seen Monday morning and the more major 2,300 area.

Those are now reinforced by weekly MA-13 in the 2,325 area this week and a weekly Oscillator threshold somewhat below 2,320 moving up into it next week. There is also another of those somewhat below the 2,300 area, moving right up into it next week.

[For those of you who are subscribers, see the latest analysis and Market Observations write-up at www.rohr-blog.com for more on the current trend evolution. Market Observations are available to Gold and Platinum subscribers.]

NOTICE: The Rohr International, Inc. research team or its principals may already have entered positions or have orders working based on this view.

Thanks for your interest.

This Current ROHR TREND ALERT!! will be available soon via the sidebar at www.rohr-blog.com for Platinum echelon subscribers.
