**Subject:** ROHR TREND ALERT!!

**Dear Alert Service Subscriber,**

**The dual Trump administration hurdles and the international situation continue to weigh on the equities to some degree. The question now is whether the June S&P 500 future remains below the key level it pushed above last week (more below.)** There still seem to be a lot of political cross currents with potential failures at present, and that includes the fitful attempts to resurrect the Trump healthcare reform effort. Those have the ability to impact the markets in either direction, even as they were encouraged recently by improved data that is also weakening a bit at present.

**Yet for any more significant equities selloff there typically need to be multiple negative influences. As noted in last Tuesday's [www.rohr-blog.com](http://www.rohr-blog.com) *Commentary: Hopes and Dopes*, the downside US equities reaction to healthcare reform legislation failure was very short lived** because the markets are still focused on the potential for the overall Trump reforms and stimulus to succeed.

**Yet the political disconnects remain very important, and this is a big week on more than the Trump healthcare and tax reform considerations.** They highlight an environment which is **prone to miscalculation and bigger problems.** The economy and market situation are nowhere near as fraught at present as into the 2008 equities meltdown. Yet visits by China's leader which relate back the North Korean challenge and other issues as well as continued issues in Europe must be closely watched.

**This is (still) the critical consideration:**

**Due to sustained aggressive increases in weekly MA-41 June S&P 500 future extended weekly Oscillator levels were moving up roughly \$7 each week. Most important was the extended weekly Oscillator resistance above the 2,300 area rising to 2,369-74 two weeks ago.**

**After it failed below the 2,370 area and interim 2,350 congestion last Tuesday, those were near-term resistance with the lower one being exceeded last Thursday without quite reaching the higher area. Yet the slippage back below 2,350 this week has been very limited so far, even being back above it after a bit of weak pre-market electronic trading this morning.**

**And as we have pointed out for weeks now, even if it were to break further, there is lower congestion, trend support and Oscillator areas into the 2,320 congestion area seen last Monday morning and the more major 2,300 area. Those are now reinforced by weekly MA-13 in the 2,330 area and a weekly Oscillator threshold into 2,320. There is also another of the latter into the 2,300 area this week.**
