Subject: ROHR TREND ALERT!!

Dear Alert Service Subscriber,

There is absolutely no change at all in our views on what is now a 'hysterical headline hiatus' with President Trump on his Middle East and European first foreign trip. Please refer to Tuesday's ALERT!! for more details. As we had noted Monday morning, that leaves less chance the very scripted nature of his communications during the trip will open up any new self-inflicted wounds.

Deputy AG Rosenstein's appointment of estimable Ex-FBI Director Mueller as Special Counsel for Russian matters relating to the Trump campaign (and wherever else that leads) should also cool down the previous hysterical headlines a bit. So after holding key lower support US equities are on an upside swing, even back above next higher resistance (i.e. a key congestion over-under: more below.) It is likely that recent decent corporate earnings will now underpin equities in a less hysterical headline environment.

This is (still) the critical consideration:

Due to sustained increases in weekly MA-41, June S&P 500 future extended weekly Oscillator levels are still moving up roughly \$5 each week in spite of the selloff since March 1st. Most important was the extended weekly Oscillator threshold above the 2,300 area rising to 2,369-74 in mid-March.

After it failed below the 2,370 area and interim 2,350 congestion in mid-March, those were resistance. Yet 2,370-75 was exceeded again by late April, and only testing the top of it several times at the beginning of May left it as support with both weekly MA-9 and MA-13 up into the 2,365-70 area. While those were violated on last Wednesday's extended selloff, the market is back above them now. Higher resistances remain around the 2,401 March 1st front month futures high, with the extended Oscillator resistance up into the 2,420-25 range this week.

And considering the extended support for any selloff, while previous slippage below 2,350 area congestion eroded that as support, it was/is also worth watching once again. It is now reinforced by the weekly Oscillator. And the fine line level in that area is the 2,347.50 April 21st weekly Close prior to the gap up in the wake of the positive round one of the French election result. And that held in overnight trading right before last Thursday's opening.
