**Subject:** ROHR TREND ALERT!! Constitutional Crisis?

**Dear Subscribers,**

**While the potential 'trade trauma' over the imposition of \$200 billion of US tariffs on Chinese goods likely added to Monday's US equities dip, the more pointed driver was the possibility raised by some Trump critics of a 'constitutional crisis'. That was on the assumption that Deputy Attorney General Rod Rosenstein was about to be dismissed based on an NYT story regarding disloyalty to Trump.**

**The story said after FBI Director Comey's May 2017 firing, Rosenstein discussed wearing a "wire" to record conversations with Trump and recruiting Cabinet members to invoke the 25th Amendment to remove Trump from office. He denied this occurring. Even those who said he said it noted it was a sarcastic response to pernicious suggestions from now disgraced ex-Acting FBI Director McCabe.**

**And all the US equities did was drop to key and obvious near-term support (more below) noted in Monday morning's ALERT!! That is rightful as the story evolved into Rosenstein's Monday visit to the White House was for a regularly scheduled meeting, and not to be fired. While he and Trump are scheduled to discuss the matter on Thursday, we are skeptical he will be dismissed. In fact, our contrarian view is if Rosenstein admits he indeed uttered the words as sarcasm, this is likely something Trump can appreciate; and may follow up with a support statement.**

**That said, the excitable bears are almost making it too easy for the trading bulls. Please see previous ALERT!!s for the very constructive OECD Interim Economic Outlook (<http://bit.ly/2xQTogU>) from last Thursday as further bullish background.**

**This is the critical consideration**

**Front month S&P 500 future (now December) still had higher resistance into the 2,840-50 area in early August, reinforced by the late July downside reaction from that area. And it was reinstated on the mid-August drop back below it. Yet not for long, even if subsequent initial recoveries stalling into the low end of that range confirmed its prominence. However, it was exceeded once again on the mid-August surge from the key 2,810-00 support.**

**Higher resistance at the 2,878.50 January all-time high was exceeded in late August, and has held on subsequent selloffs. The next classical weekly Oscillator resistance into 2,895-2,900 was also overrun. While we often discount the 'big penny' level, in this case it is meaningful. Slipping below 2,895-2,900 congestion left it resistance the September contract pushed back above two weeks ago.**

**And the 5.00 premium December S&P 500 future looked that much better into last Friday's September contract expiration. Higher resistance at the recent front month 2,917.50 high was exceeded last week, and held there on Monday as near-term support (as expected.) It is reinforced by 'classic' Oscillator resistance that rises to 2,925-30 this week. 2,955-60 is next classical Oscillator resistance this week, with an 'extended' interim level at 2,975 and next major threshold at 2,995-3,000.
