Subject: ROHR ALERT!! NOTE: Holiday Reminder & Much the Same

Dear Subscribers,

We are coming to you earlier than usual today with the reminder that today is a full US market holiday for the Martin Luther King Jr. Day memorial observation. We are off all day, and market activity is cooperatively contained.

That said, the end of last week was a key indication of the US equities ability to sustain the post-Christmas rally. We suggest a read of Friday's 'Bad News is Good News?' ALERT!! for more detail on how so many negative short-term influences are translating into buoyant equities and weighing on the govvies.

We will be back in the office Tuesday morning with more 'macro' insights and any further Evolutionary Trend View changes on the price activity. In the meantime, the 'critical consideration' below is updated (including a chart) to provide more insight on why the activity late last week was such an important trend indication.

This is the critical consideration

Ever since the front month S&P 500 future dropped below the early 2018 lows into mid-December, we skipped a lot of our previous higher level activity discussion that becomes relevant once again as March S&P 500 future pushes back above the 2,635 resistance (including weekly MA-13.) Along with lower 2,600 congestion it has been back above since Tuesday January 15th, that puts the 2,675-70 area (including the 2017 Close) and failed 2,708 UP Break back in play.

At this point it must be noted that the push back above the full 2,600-35 range has both ratcheted the March S&P 500 future back into the October-early December trading range. The importance of that with the fresh weekly down channel UP Break (2,600) and key moving averages being exceeded is apparent on the 3-year weekly continuation chart (<http://bit.ly/2Dmz3BE>.) Only a failure back below 2,600 area will restore any near-term bearish momentum. Yet there are also key higher resistance levels back up into the Negated 2,708 UP Break, interim mid-2,700 area congestion (also weekly MA-41), and prominent low-2,800 area top of the range.

While the December drop below early-2018 2,529-52 lows was critical due to next significant lower support not being until the major 2,400-low 2,300 area, that held its Tolerance into the early 2017 2,318 congestion area low right after Christmas. This can still be seen on the monthly chart (<http://bit.ly/2VBvb6D>) from the end of last year; it highlights the degree to which broad up trend support was held.

[For those of you who are higher level www.rohr-blog.com subscribers, see the latest analysis and Market Take in the daily emailed ROHR-BLOG notes and occasional posts for more on the current Evolutionary Trend View.]
