**Subject:** ROHR ALERT!! Bow Shot

**Dear Subscribers,**

**US equities having such a lacklustre performance on recent stronger data seems like a proverbial “warning shot across the bow” of the good ship US Equities Bull. On top of the improved Chinese data of the last few days, there was also this morning’s firm global Advance PMIs and much stronger than expected UK and US Retails Sales. The latter was a sharp recovery from a couple of months of substandard figures, yet was an eye-popping +1.6% (versus +0.8% estimated.)**

**And we are coming to you quite a bit earlier than usual (even prior to further US data this morning prior to the long Easter holiday weekend) due to US Attorney General William Barr’s press conference at 09:30 EDT (08:30 CDT; 13:30 GMT.) That is still several hours prior to his release of the redacted version of the Mueller Report on Russian interference in the 2016 US election.**

**This is only important to markets insofar as some of the recent untoward US equities nervousness may be anticipation of potential US political disarray. Might this be the driver for recent US equities ambivalence when the September all-time high was within striking distance at the end of last week? We shall soon see.**

**On past form it is typical for bull trends to top out into the last of the good news. That’s what the US equities feel like for the past couple of sessions. It will now be important to see whether the June S&P 500 future falls out further below the key 2,900-10 range (especially 2,890 coingestion), or resumes its push up toward September’s 2,947 all-time high. The current trend momentum is now critical.**

**For those who have not done so already, we once again suggest a review of the extended discussion of those remaining global economic drags in Monday’s ALERT!! and its references to earlier assessments like last Thursday’s analysis.**

**Another Repeat of Monday’s critical consideration (still the same)**

**The front month S&P 500 future pre-December activity above the early 2018 lows became relevant again after March S&P 500 future crossed back above 2,600-35 congestion in mid-January. The importance of the January weekly down channel UP Break (2,600) also exceeding key moving averages is apparent on the weekly continuation chart (<http://bit.ly/2v8d8sl> updated through last Friday’s Close.)**

**It is also obvious that the mid-March surge above the 2,825-14 resistance opened the door to more strength despite weak data. After wild mid-March swings, it left a weekly DOWN Closing Price Reversal from 2,830 (Tolerance 2,836.50.) Yet it could not sustain subsequent weakness necessary to confirm a ‘single period’ reversal, and the late-March weekly Close above 2,830-36 Negated that DOWN CPR.**

**Higher resistances were the 2,865-80 area it has now overrun, and 2,900-10 from back in September it is now just a slight bit above. That is the very important last congestion resistance (also weekly Oscillator) this side of the 2,947 all-time high.**
