Subject: ROHR ALERT!! NOTICE: ISP Technical Problem

Dear Subscribers,

We have been experiencing technical problems with our internet connection that has precluded completion of our updated analysis this morning and our Weekly Report & Event Calendar (for Sterling and higher echelon subscribers.) Our ISP assures us everything will be addressed later today, and we look forward to getting back to full analysis and sending the calendar into Tuesday morning. And it is the case that this is a very light reporting day in any event.

That said, our Evolutionary Trend View on all markets remains much the same as last week. In a nutshell, global central banks moving to a more accommodative stance has assisted both the US equities (and others) as well as govies at the same time. It has also weighed on a previously resilient US dollar, and especially helped the emerging currencies on a sense of greater chances for a return to global growth with less likelihood of developed economy rate hikes that can weigh on emerging currencies.

We look forward to getting back to our regular analysis, and in the meantime...

...here is a courtesy repeat of Friday's critical consideration

It is obvious that the front month S&P 500 future mid-March surge above the 2,825-14 resistance opened the door to more strength. June S&P 500 future pushed above it along with 2,830-36, and the lower 2,800 area left as support.

2,900-10 area resistance from September was overrun back in late April. That led to the retest of September's 2,947 front month future all-time high into May 1st that extended to the 2,961 May 1st new all-time high. Even in the wake of the initial early-May 'Trump dump', it was only back around that 2,910-00 support.

However, once that was violated, it was reasonable to anticipate a test of lower supports at previously violated 2,865 resistance, 2,836-30 and 2,825-14 all the way to the 2,800 'big penny'. And even after the recent US-Mexico tariffs scare selloff back near the 2,722 March trading low two weeks ago, US equities saw a sharp rally on those fears abating. Lower key support noted above in the low 2,800 area as well as 2,865, 2,836-30 and 2,825-14 were all reinstated.

Higher resistance was again 2,900-10 area, with the early May 2,938.25-2,947.50 gap lower from the all-time high Close above. As those are now also overrun, it is time to reference historic Oscillator levels once again. Those are near the old 2,961 all-time high at 2,965-70, with 2,985 and 3,005-10 above that. With weekly MA-41 stable into the 2,775 area, those will remain the same in coming weeks.

Thanks for your understanding during our ISP problem.

Best regards-

Rohr
