**Subject:** ROHR ALERT!! US Political Follies

**Dear Subscribers,**

**It's almost hard to know where to start... the foolishness on both sides has reached Brobdingnagian proportions at the worst possible time. And we are coming to you much earlier than usual as firm Advance Manufacturing PMIs with very weak Services are less relevant than the macro factors. Democrats push a much broader political agenda than is consistent with reasonable timely rescue of the US economy while 'Dr. Donnie' is prescribing off-label cures for COVID-19.**

**Is this a great country or what? Still consistent with Monday's 'Shades of 2008!' ALERT!!, it is also still as troubling as one might expect for the US public and major international economies and US equities. While it initially seemed strange to us (and we presume many others) that Democratic Party leaders would have shut down an almost complete 'bottom up' bipartisan COVID-19 economic rescue package negotiation that was almost complete, there is method to their madness.**

**And it seems it is indeed madness with so much at stake on the global necessity for timely action. To cut to the chase, the party leaders wanted to add their Liberal 'wishlist' to the massive rescue spending. Looks like they're still on board with top Obama advisor Rahm Emanuel's observation, "*You never want a serious crisis to go to waste*" ...regarding the ability to use it to further a broad agenda.**

**So as crazy as it is that Donald Trump can use the COVID-19 task force press conference to suggest the off-label use of some FDA approved medicines as a COVID-19 therapy, the Dems now seem even more insane on hamstringing the business and economic rescue effort. A partial peek at their wishlist includes....**

**Eliminate the US Postal Service debt; impose emissions standards on aircraft manufacturers and airlines; extension of nonimmigrant visas; corporate board diversity quotas; same day voter registration... and it goes on and on...**

**So we are going to segue into a fresh blog post later today where we can expand on the overflow of additional information on the US political follies and some other interesting and important information. That will include a credible COVID-19 update source we've found, which also has a global interactive COVID-19 map.**

**While we never blindly agree with either of the highly partisan US sides, it seems the Republicans have a point on the purely political agenda items the Democrats are attempting to counterproductively ladle into the COVID-19 rescue package.**

**In the meantime, yes, the fate of the US economy and especially the near-term stabilization (not even asking for a major rebound) of the US equities, and likely the emerging currencies as well, rests with the US Congress. Swell... Can't wait. For anyone wanting more specifics on the US Congress negotiation breakdown, we suggest referring back to Monday's ALERT!! for the informative video links.**

**Courtesy Repeat of Monday's critical consideration**

**The COVID-19 virus spread had caused the US equities intermediate-term bull psychology to 'crack'. Yet does this signal a 'breakdown' into a bear trend? The current overall selloff below front month S&P 500 future 2,600 area being a fresh DOWN Break would speak of that. As bad as US equities already looked on the violation of key congestion around mid-2019 highs**

(highlighted in our previous 'Crunch Time' ALERT!!), the 'broad' trend support has now been violated.

2,600 area was the lower US equities trend support on the longer-term weekly chart channel (<https://bit.ly/2xl5MXe> updated as of Friday's Close.) So in addition to June S&P 500 future (front month since Friday) violating the support from the push above the multi-year topping line at 3,070, the 2019 3,030-00 previous all-time high congestion and now the late-February 2,970 DOWN Break below the up channel (from the 2,313 late 2018 low), it has failed below major lower support.

That was also below front month S&P 500 future congestion in the already noted interim 2,850 area followed by the more prominent 2,750 area. That 2,600 area broadest weekly channel support (also 48-month MA) had a Tolerance to the late 2018 2,413-09 weekly UP Closing Price Reversal (also historic congestion.) The extreme low trade of that UP CPR is 2,313 (more historic congestion) since the late 2016 rally has now been violated as well.

Below that next supports are not until the interim 2,275 already tested Friday and now violated, and more credible 2,200 mid-2016 congestion also traded below earlier today. More major lower support is not until the major all of 2015 2,125-00 congestion, and ultimately hefty 2013-2016 congestion at 2,000-1,970.
