Dear Alert Service Subscriber,

We are back to being more circumspect on the MARCH S&P 500 FUTURE.

Failing early Thursday from the 2,010 level in spite of surprising aggressiveness of the ECB QE moves looked negative on the weakness back below interim technical levels in the 1,996 area and 1,985. However, as noted in Thursday's 11:00 Follow-Up ALERT!!, the MARCH S&P 500 FUTURE failure to get out above that early 2,010 high still only left it dropping back down to its next test of the far more critical 1,975-70 that it failed to provide earlier last week.

Reinforcing that this remained important support, and that it seemed to hold initially, left the bears on the defensive after lunch (US time.) **So once it was back above 1,986 on Thursday's Close it left the bulls back in control of the trend.**

That said, the MARCH S&P 500 FUTURE current swing back up to the top of the 2,010-20 range warrants caution once again. It is still looking good on the current 'Goldilocks' psychology into this week's central bank rate meetings Tuesday through Thursday (BoJ, FOMC, BoE.) Yet it is likely best to respect the current stall into the top of the 2,010-20 range, which is after all also the top of a two day \$50 rally. If it should Close above that level, higher resistances are up in the 2,035, 2,050 and 2,060 areas, with the ultimate resistance not until 2,075-85.

Also as noted earlier, **in the wake of generally weaker economic data the potential to still hold sharp selloffs is very consistent with our 'Goldilocks' ('not too hot, not too cold') EQUITIES perspective.** For much more on that see the post from two weekends ago on www.rohr-blog.com *Equities' Goldilocks Psychology*, which also includes the more forward looking negatives that likely keep equities a bear overall. (That is mostly open source, so you only need a FREE Silver echelon subscription to read the bulk of it.)

A concise overview of the negative factors that were explored at length in that post can be reviewed in our letter that the Letters Editor at the Financial Times was kind enough to post in the FTWeekend edition on Saturday at <http://bit.ly/1nnDW1B>.

[For those of you who are subscribers, see the latest TrendView video analysis at www.rohr-blog.com for more on the technical trend indications and an extended macro-fundamental influences discussion. It is available to all Gold and Platinum echelon subscribers along with the Market Observations.]
